

## KCDB REPORT TO THE JCRB

March to September 2020

### Executive Summary

The new version of KCDB – KCDB 2.0 – is on-line since the 29 October 2019, providing search facilities of CMCs and comparisons, a user platform supporting intra- and intra-RMO reviews, a frame for comparison registration and publication, and a tool for user-generated statistics.

The previous delay in CMC and comparison publication, a consequence of the transition from the former to the new software support, has been largely absorbed<sup>1</sup>.

The CMCs published since the implementation of KCDB 2.0 are presently provided via two different paths:

- i) CMCs approved on the former JCRB support and imported by the KCDB Office;
- ii) CMCs drafted, reviewed, approved and published on the KCDB web platform.

The implementation of the KCDB 2.0 has been accompanied by making available a variety of guidance material and demonstrations to users within the frame of the CBKT.

### Introduction

This report summarizes the major progress and evolution of the BIPM Key Comparison Database (KCDB) over the last six months.

A new version of the KCDB - KCDB 2.0 - was implemented on 29 October 2019. The platform is progressively being used for CMC submissions, and is now used on a daily basis for comparisons.

The status of the database concerning **Calibration and Measurement Capabilities** are given in Section 1. In Section 2, recent information concerning **comparisons** carried out within the frame of the CIPM MRA is summarized. Section 3 highlights the status of **Associates** of the BIPM, and a short view on the status of **the KCDB 2.0** is presented in Section 4.

This report reflects the status as of 26 August 2020.

## 1. CIPM MRA Appendix C : Calibration and Measurement Capabilities

### 1.1. CMC status

The new database became accessible in October 2019. A large number of CMCs that previously had been posted on the JCRB web were approved during the time the database was inaccessible when installing software and carrying out the data migration<sup>1</sup>.

---

<sup>1</sup> 35 batches were published, 7 batches remains of which 4 are object for feedback from the submitting institutes.

The previous delay in the publication of CMC data when launching the KCDB 2.0 has been largely absorbed. The CMCs that presently get published on the KCDB have two sources:

- i) CMCs approved on the former JCRB support and imported by the KCDB Office;
- ii) CMCs drafted, reviewed, approved and published on the KCDB web platform.

Figure 1. Number of CMCs registered in the KCDB since October 2008.

The CMC batches that remain to be published on 26 August 2020 are listed in Appendix I.

There are presently<sup>2</sup> 25 801 (25 202) CMCs published in the KCDB end of August 2020 of which 19 238 (18 792) are in Physics and 6 563 (6 410) in Chemistry and Biology. The total number of published CMCs have increased by 2.2 % over a one-year period.

The repartition of CMCs is available in real-time from the KCDB home page in “CMC statistics” <https://www.bipm.org/kcdb/cmc/statistics/public> . The Excel files previously used as a basis for the CMC statistics are still available on the [access-restricted JCRB CMC website](#) (on “KCDB statistics”).

The status of not yet published CMCs is listed in Table 1-a. 872 (383) CMCs are presently in an “intermediate” state.

**Table 1-a** Status of not yet published CMCs in KCDB on 26 August 2020.

## 1.2. CMC evolution

The total number of published CMCs during the last 6 months for each metrology area is listed in Table 1-c. These numbers include revised CMCs and upload of greyed out CMCs (460), not necessarily needing an intra-RMO review.

The first CMCs for Mongolia were published on 15 July 2020 in Mass and related quantities. Those were submitted via the APMP.

35 CMC batches, approved on the JCRB web site, were published by the KCDB Office via importation. These are listed in Table 1-d.

### 1.3. Greyed out CMCs and reinstatements

The greyed out CMCs that previously were not included in the database were added to the KCDB 2.0 and may be consulted via the Statistic tool after logging in.

There are presently 475 greyed out CMCs. The most recent events on greyed out CMCs from end of February 2020 are listed in Table 1-e. Table 1-f displays all greyed out CMCs where the most recent events are highlighted in yellow.

#### 1.4. Format of uncertainty equations

A request from CCL, supported by CCM, to use replace the numerical equation format (presently applied in the KCDB) by quantity equations, was approved by CIPM members at the Consultative Committee President's meeting in June 2018.

The transition to this new format requests a revision of the uncertainty equations. The JCRB Executive Secretary and the KCDB Office developed instructions how to carry out such revision.

The TC-L of EURAMET made the revision May/July and the revised CMCs were successfully uploaded by the KCDB Office in July.

## 2. CIPM MRA Appendix B : Key and supplementary comparisons

### 2.1. Comparison status and evolvement

On the 26 August 2020 the KCDB covered 1672 (1648) comparisons online distributed as listed in Table 2; 1060 of these are key comparisons and 612 supplementary comparisons. This represent a total increase of 24 comparisons, all registered by the pilots using the KCDB web platform.

**Table 2** Key and Supplementary Comparisons on 26 August 2020.

Figure 2 shows the evolution of the total number of key (dark blue) and of supplementary (peach) comparisons registered in the KCDB since September 2003. The annual increase of key comparisons seems to have stabilized to around some +40 taking into account the history since 2004. The annual increase of key- and supplementary comparisons is around 6 %. The ratio of supplementary comparisons, 20 % in 2006, keeps progressing and constitutes 37 % of all comparisons. The graph include repeats of key comparisons.

<sup>3</sup> The GULFMET was approved as an RMO on a provisional basis by the CIPM in October 2015.

**Figure 2.** Total number of key comparisons (dark blue) and supplementary comparisons (peach) registered in the KCDB: evolution since September 2003

**Figure 3.** Number of new comparisons registered in the KCDB over the one-year period ending at the date indicated on the abscissa.

The number of new key and supplementary comparisons registered in the KCDB over the one-year period ending at the date indicated on the the abscissa is illustrated in Figure 3.

Graphs generated in real-time illustrating the participation in key and supplementary comparisons are available under the Statistics menu on the KCDB home page:

End of August 2020, 69 abandoned or superseded key and supplementary comparisons were kept in the KCDB archives (included in the presented statistics).

**2.2. Comparisons older than 5 years** (Follow-up Action 33/3 of JCRB 2015)

**Action 33/3:** *The BIPM KCDB office, as part of the KCDB report to the JCRB, to identify Key and Supplementary Comparisons which were started 5 or more years ago and have not reached a conclusion.*

The number of unfinished comparison older than 5 years shows a slight decrease from previous years. The total number is illustrated in Figure 4. A list of the comparisons concerned may be found in Appendix II.

**Figure 4.** Histogram showing the number of incomplete comparisons that started more than 5 years ago.

### 3. Participation of Associates of the CGPM in CIPM MRA activities

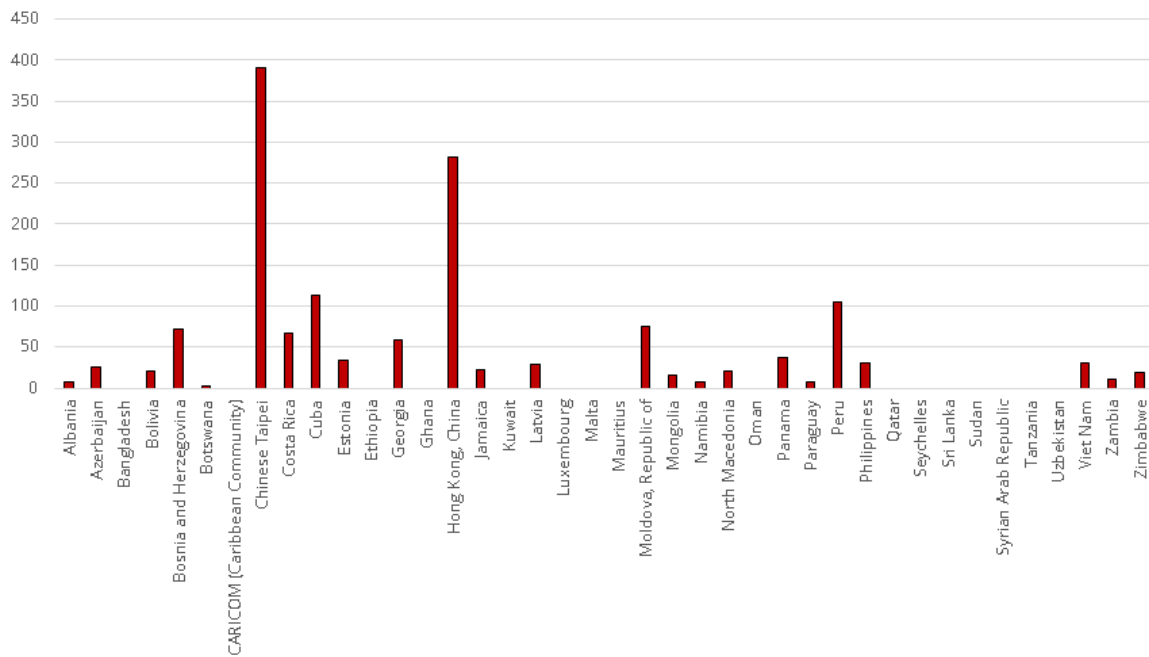

Table 3 summarizes the participation of the 40 Associates of the CGPM in CIPM MRA activities as at 26 August 2020. In particular, Mongolia submitted their first CMCs and Azerbaijan increased their number of CMCs during the last 6 months.

#### 4. Status of the BIPM KCDB 2.0

- The KCDB 2.0 was implemented on 29 October 2019, and the KCDB web platform was successively made available to the different metrology areas.
- The implementation has been accompanied by providing a variety of guidance material, cf. <https://www.bipm.org/en/about-us/kcdb-help.html>, and demonstrations to users within the frame of the CBKT <https://www.bipm.org/en/cbkt/>, see also Appendix III.
- A statistical tool was added in January 2020.
- The KCDB 2.0 software is supported by an Application Management contract. Revealed anomalies are corrected; the software has been updated at a number of occasions since start. Anomalies and suggestions for improvements may be communicated by the users by completing the form [https://www.bipm.org/utis/common/pdf/KCDB\\_2.0/Form\\_for\\_declaring\\_an\\_anomaly\\_or\\_request.docx](https://www.bipm.org/utis/common/pdf/KCDB_2.0/Form_for_declaring_an_anomaly_or_request.docx).
- The first CMC that has been drafted and approved on the KCDB web platform was published on 2 April 2020 - there are now 118 such CMCs. The average duration of the JCRB review of 1 CMC is 76 days.
- The first comparison results were published on the platform 27 November 2019. Comparison pilots are now using the platform, and the workflow seems fluid.

##### 4.1. Quality System

The Quality System underpinning the previous version of the KCDB is obsolete.

A main quality procedure was drafted and the KCDB Office underwent an internal audit in November 2019. The issued instructions on the KCDB 2.0 (cf. section 4.1) are incorporated in the Quality System for the KCDB.

The main procedure has now being replenished by technical instructions, in particular those covering back office procedures realized by the KCDB Office. An new internal audit is planned for September 2020.

##### Acknowledgement

Many thanks to the BIPM IT team Laurent Le Mée and Thierry Nguyen for their prompt actions and solid support. We acknowledge also the collaboration with Sten Bergstrand (JCRB Executive Secretary), Chingis Kuanbayev and Robert Sitton (both BIPM).
